Student Co-ordinators	Mr. Amit Kumar
Number of Participants	20
SDGs Covered	4, 12,13

Repurposing Plastic Waste - Creating Garden Bed Walls!!

The **Centre of Excellence for Sustainability** organized a two-day workshop on Repurposing Plastic Bottles (Phase II) from 20th to 21st February 2025. **Mr. Hamid Raza, Senior Horticulturist**, Office of Infrastructure, was the Resource person, who first made the participants aware of sustainable practices while encouraging creativity and teamwork. This was followed by hands-on activities for the students.

The session focused on **utilizing plastic bottles to design and construct garden bed walls**, promoting environmental awareness and reducing plastic waste.

The workshop was a resounding success. Students not only learnt practical skills; but also developed a deeper understanding of sustainability and waste management. The beautifully designed garden bed walls served as a testament to their creativity and commitment to environmental responsibility.

Additionally, the initiative inspired students to explore further possibilities of repurposing waste materials for constructive purposes.
