Event Name	International Day for the Preservation of the Ozone Layer
Date	16 September 2026
Time	2:00 pm onwards
Venue	Yellow Point Farm Area, Near STP 3
Activity	Plant-a-Sapling: “Green Shield for Earth”
Resource Person	Mr. Hamid Raza (Senior Horticulturist)
Faculty Coordinators	Mr. Mohit Kumar
Organised By	Centre of Excellence for Sustainability in collaboration with Centre of Global Education, Department of Applied Sciences, Chitkara University Institute of Engineering & Technology & Chitkara University School of Maritime Studies
SDGs	13,15

OBJECTIVES

- To promote environmental awareness and encourage active participation in climate action.
- To highlight the importance of trees and green cover in supporting healthy ecosystems and mitigating environmental challenges.
- To encourage students and faculty members to adopt sustainable and environmentally responsible practices.
- To promote collective and consistent environmental action through plantation activities.
- To contribute towards SDG 13 – Climate Action and SDG 15 – Life on Land.

DESCRIPTION

The initiative aimed to raise awareness about the importance of protecting the environment and strengthening sustainable practices. **More than 120 students and faculty members actively participated** in the drive, demonstrating their commitment towards environmental conservation and climate action. As part of the activity, **150 plants were planted** in and around the Yellow Point Farm area. The plantation drive provided an opportunity for the university

community to contribute directly towards enhancing green cover, supporting biodiversity, and creating a healthier campus environment. By connecting plantation with climate action and the protection of terrestrial ecosystems, the initiative reinforced the message that every choice matters and consistent environmental action can contribute to protecting the planet and sustaining life on Earth

OUTCOMES

- To foster a sense of environmental stewardship and responsibility among students and faculty members.
- To provide participants with an opportunity to engage in a practical sustainability initiative.
- To encourage active involvement in campus-based environmental conservation efforts.
- To strengthen the culture of sustainability and environmentally conscious practices within the university community.
- To inspire continued participation in initiatives that support long-term ecological well-being and sustainable development.

CONCLUSION

The event reinforced the message that collective and consistent environmental action can contribute meaningfully to a sustainable future. Through such initiatives, Chitkara University continues to encourage students and faculty to adopt responsible environmental practices and actively contribute towards the United Nations Sustainable Development Goals (SDGs), particularly SDG 13 – Climate Action and SDG 15 – Life on Land. The Plantation Drive served as a meaningful reminder that protecting the ozone layer and addressing broader environmental challenges require sustained participation and action from every individual and community.
